

I would start receiving it.

After some time I complained asking "how long before its approved," and pleaded for something for my pain, I was denied again and again, nothing ever happened, "No Medical Care What so Ever."

Again after putting in sick call slips I saw another Doctor and I again told him Elivile isn't doing me any good, its a total waste of money, could someone "please" give me something for my pain, I can't stand this much longer and I was told "well its all your going to get" "want it or not," I said yes because "I was devastated to even think about going without anything."

My condition got worse, my involuntary muscle spasms would jump, for sometimes hitting the metal frame of my bed causing deep cuts in my leg that left scars, of which I would show the Medical Staff, still I was denied Medical Attention but was given an Ace Bandage to wrap my leg up. I get burning and electrical pains that are constant but at times flares up causing tremendous pain which would and still last up to 20 to 30 minutes at a time.

I am a disabled Chronic Care patient that regardless of obvious, immediate, everyday Medical needs, from May 10th, 2004 to present August 11th, 2005, Medical Care has Consistently denied, (see Medical Records - Institutional lag book records - Correspondence letters informing Warden Raphael Williams, Commissioner & Tan Taylor et al. to no avail). Doctors and Nurses

Dr. Roach, Dr. Fisher, Dr. Ali, (Dr. Hershey - a specialist at
Christiana Hospital), Head Nurse Diane Hernandez,
Head Nurse Emma, Dr. Aramburo, and more Medical
Staff of which I can not remember but Medical
Records will show and prove my case beyond
any doubt.

Respectfully Submitted
Ricky James Hamby
